

SALINITY REFRACTOMETER

เครื่องวัดความเค็ม

MODEL : RHS Series

DESCRIPTION

This salinity refractometer is designed for testing the concentration of salt water and brine and used for quality control in research and clinical laboratories and marine industry. Its scale provides a direct reading of the specific gravity and concentration (Parts per Thousand) of salt in water.

FEATURES

- Sturdy and light weighted Aluminum body
- High quality and accurate testing result
- ATC Compensation Range (i.e. Built-in Automatic Temperature Compensation System) from 10°C to 30°C
- Easy and very convenient to use

SPECIFICATION

Model	Range	Min. Div	Accuracy	Remark
RHS-10ATC	0-10%	0.1%	±0.1%	ATC
RHS-28ATC	0-28%	0.2%	±0.2%	ATC
RHS-35ATC	0-35%	0.5%	±0.5%	ATC
