

## 4 CHANNELS K TYPE SD CARD LOGGER

เครื่องวัดอุณหภูมิ

MODEL : SD900

**TLEAD**

### FEATURES

- Super big LCD portable/wallmount SD card logger
- Measure temperature via K Type thermocouple
- 4 Channel K Type thermocouple to use at once
- Unlimited manual memories in SD card
- Unlimited autologging memories in SD card
- HOLD function freezes current readings
- Checking MAX/MIN value from power on
- Beeper and LED alarm are both available
- One button press to display T1-T2
- Display temperature change from baseline
- Programmable temperature HIGH/LOW alarm limit
- Temperature offset function for adjustment purpose
- Over-range indication with error messages
- Blue backlight function works in dark area
- 12 hour/24 hour time format selectable
- Real time display (iyear-mon-date, hour-min)
- 20 mins auto power off to save power
- Temperature units (°C/°F) selection
- Powered by 4pcs AA batteries (included in the set) or 9V adaptor (not included in the set)
- Low batter indicator

### SPECIFICATIONS

- K Temp. Range: -200 to 1370°C, -328 to 2498°F
- K Temp. Resolution: 0.1°C, 0.1°F
- K Temp. Accuracy (under 18 to 28°C ambient temp.):  $\pm(0.3\% \text{ rdg} + 1^\circ\text{C})$
- Sampling Rate: Programmable from 1 second up
- LCD Size (HxW): 47x104mm
- Operating Temp.: 0 to 50°C
- Operating RH%: Humidity < 80%RH
- Storage Temp.: -20 to 50°C
- Storage RH%: Humidity < 90%RH
- Dimension (LxWxT): 152x100x39mm
- Weight: 300g
- Power Supply: 4xAA Batteries (included in the set) or 9V adaptor (not included in the set)
