

Wireless Weather Station Humidity Temp °C/°F Backlight 2 Outdoor Sensor RCC DCF

เครื่องวัดสภาพอากาศ WTH900

This Wireless Weather Station is a great device for monitoring indoor and remote outdoor temperature and humidity simultaneously. It can support up to 3 wireless remote sensors. However 2 sensors are already included in this set for monitoring two different places. It also provides you the reference information of weather forecast & trend with 4 different icons (Sunny, Slightly Cloudy, Cloudy, and Rainy). It has a date display and calendar and can be set up in either 12 or 24 hour format. The weather station measures both indoor and outdoor temperatures in either Fahrenheit or Centigrade with moon phase display. Both the station and sensor can be placed on desktop or mounted on wall. This weather station set is ideal for home and office use.

Radio-Controlled Clock is a clock that is synchronized by a time code bit stream transmitted by a radio transmitter connected to a time standard to provide accurate timing. This model supports DCF signal emitted from Frankfurt, Germany with a range up to 2000km (covering 148 European cities).

Features:

- Display for In/Out Temperature and Humidity
- Weather forecast with icons Sunny, Slightly Cloudy, Cloudy & Rainy
- Temperature in °C or °F
- Date & time
- Radio-Controlled Clock supporting DCF (covering 148 European cities)
- Display of Date, Month, days of the week, weekly display
- Week can be expressed in 7 languages (English, German, French, Italian, Spanish, Dutch, and Danish)

- Time display in 12 / 24 hours modes
- Alarm/snooze function

- Indoor comfort level
- Wall mount or table stand
- Indication for environment comfort
- Blue LED backlight
- Two (2) wireless outdoor sensor included in the set

Specifications:

- Transmitting frequency : 433 MHz
- Indoor temperature : 0 ~ 50 °C
- Outdoor temperature : -20 °C ~ 60 °C
- Indoor Humidity: 20% ~ 95% R.H.
- Outdoor Humidity: 20% ~ 95% R.H.
- Continuous Perpetual Calendar up to 2099
- Radio-Controlled Clock format - DCF
- Auto receive DCF77 time signal
- Temperature unit: °C / °F
- Six Buttons: time, alarm, up, down, Channel, SNZ/Light
- Snooze function for 5 minutes
- Channels: CH1, CH2, CH3 gives you the option of polling 3 outdoor sensors with one weather station)
- Power supply
 - Main unit : 2 x 1.5 V AA Batteries (Batteries not included)
 - Remote sensor : 2 x 1.5 V AAA Batteries (Batteries not included)
- Dimension
 - Main unit : 18.5 x 7 x 13.5 cm
 - Remote sensor : 10.5 x 6.8 x 2.5 cm
- Weight
 - Main unit : 354 g (battery excluded)
 - Remote sensor : 75 g (battery excluded)

Set Includes:

- 1x Main Unit (Receiver)
- 2 x Remote Sensor (Transmitter)
- 1 x English Instruction manual
