

# WEATHER STATION

## เครื่องวัดสภาพอากาศ

**MODEL : WTH901**

Weather Station 2 Sensor In or Outdoor Humidity Temp Barometer RCC 110V or 220V

This Professional Weather Station with 2 wireless sensor provides accurate, real-time weather data of indoor and outdoor temperature, humidity and Air Pressure. It supports up to 3 wireless outdoor transmitter. It provides you references for seven kind of weather forecast (sunny, slightly cloudy, cloudy, rainy, heavy rain, snow, and heavy snow). Predict the coming 6~12 hours weather status according to pressure values and pressure dynamic BAR chart.

This model has Radio Controlled Clock (RCC) function. It has colored screen display with moonphase, calendar (day, date, month) and 12/24 hour format.

Radio-Controlled Clock is a clock that is synchronized by a time code bit stream transmitted by a radio transmitter connected to a time standard to provide accurate timing.

This model supports DCF signal emitted from Frankfurt, Germany with a range up to 2000km (covering 140 European cities).

- Measure Indoor / Outdoor Temperature / Humidity
- Seven kind of weather forecast : sunny, slightly cloudy, cloudy, rainy, heavy rain, snow, and heavy snow
- Moonphase display on the screen ( New Moon, Waxing Moon, Full Moon, Waning Moon)
- Time, date, day and month display
- Snooze and 2 alarms function
- Selectable temperature unit °C/°F
- 12 / 24 hour time display format
- Up to 3 outdoor transmitters receivable (note: comes with 2 sensor is included in the set)
- Display last 12 hours barometer dynamic BAR picture
- MAX/MIN temperature and humidity memory
- MAX/MIN of the last 12 hours barometer value memory
- Display freezing point caution in the screen when outdoor temperature is between (-4~1°C)
- Colorful screen display with LED backlight
- RCC function
- Desktop or wallmount display
- With 2 wireless sensor included in the set
- 110V or 220V Power Adaptor Available

**TLEAD**

#### Specification

- Temperature Range:
  - Indoor: -10 to 60°C (14 to 140°F), Resolution: 0.1°C
  - Outdoor: -25 to 70°C (-13 to 158°F), Resolution: 0.1°C
- Indoor/Outdoor Humidity Range: 20 to 99%, Resolution: 1%; humidity tolerance: ±5%
- Barometer Scope: 800 - 1100HPA
- Indoor/Outdoor Temperature Accuracy range: ±1°C
- Channels: CH1, CH2, CH3
- Radio-Controller Clock format: Germany DFC (140 European cities)
- Power Supply
  - Main unit: 110V or 220V Power adaptor (included in the set) / 3x1.5V AA Batteries
  - Remote sensor: 2x1.5V AAA Batteries
- Dimension
  - Main unit: 16×16.5×2.6 cm (approx)
  - Remote sensor: 10.5×6.8×2.4 cm (approx)
- Weight
  - Main unit: 324g (battery excluded)
  - Remote sensor: 72g (battery excluded)

#### Set includes

- 1×Main Unit (Receiver)
- 2×Remote Sensor (Transmitter)
- 1×Power Adaptor (choose one from the available 110V or 220V)
- 1×English User Manual
- Standard Packing Box
