

# DV23 CAT IV Non-Contact AC Voltage Detector

Rugged CAT IV rated non-contact Voltage (NCV) Detector displays a red LED with audible beeper when it indicates the presence of live wires. The non-contact detection feature allows user to be at a safe distance from area being tested when presence of live voltage is unknown. Ideal for troubleshooting electrical wiring, appliances, automotive repair and electronic devices.

## Features

- Non-Contact AC Voltage detection of AC Voltage from 50 to 600V, 50/60Hz
- Safely determine if wires are hot
- Audible and visual red LED light indicator
- Convenient built-in pocket clip
- Tip fits into AC outlets or against wire insulation testing
- CAT IV-600V category safety rating
- Dimensions: 6.25x1" (159x25mm); Weight: 1.5oz (42g)
- Complete with two AAA batteries
